

Zhufeng Wang

AI Application Developer / Data Visualization Engineer (Class of 2026)

Male · Born 1997.12 · Xuchang, China (open to relocation)
Phone: (+86) 173-6156-4098 Email: wang.zhufeng@outlook.com

EDUCATION

University of Technology Sydney (QS 88) | M.Eng., Software Systems Engineering 2025.05 – 2026.07

In progress · current standing High Distinction (avg. 85+, final pending). Core courses: .NET Application Development (C#), UNIX System Programming, Enterprise Architecture, Cloud Computing, Software Testing.

Lanzhou University of Technology | B.Eng., Software Engineering (GPA rank 11/151) 2016.09 – 2020.07

Core courses: Data Structures & Algorithms, Computer Networks, Compiler Principles, Computer Organization.

TECHNICAL SKILLS

- **AI Engineering:** Familiar with the full RAG pipeline (chunking / hybrid retrieval / rerank / evaluation) and core Agent concepts (task planning, tool use, context management);
- **AI Tools:** Proficient with Claude, Gemini, ChatGPT, Claude Code and Cursor for code comprehension, generation, refactoring and task decomposition;
- **AI Workflow:** Build a personal knowledge base and AI-assisted workflow with Obsidian + Claude; strong AI-native working habits;
- **Frontend / Visualization:** Proficient in Vue3, ECharts data-visualization dashboards, HTML5 / CSS3 / JavaScript (ES6+);
- **Backend / Languages:** Proficient in C# (.NET) and Python (Flask); familiar with Java;
- **English:** IELTS 6.5; English-taught master's program; reads technical docs and collaborates cross-team in English.

PROJECTS

Coal-Mine Gas Detection & Early-Warning System | ZTE Group 2025.09 – 2026.05

- Built a multi-chart, real-time monitoring dashboard with Vue3 + ECharts, enabling dynamic refresh and interaction over multi-source sensor data;
- Integrated a Python / Flask backend for end-to-end debugging; contributed to the logic and threshold tuning of the “three-segment” anomaly-detection algorithm; deployed to a test environment.

UTS Library (Building 1) Data Monitoring Dashboard | Supervisor's Team · UI 2025.07 – 2026.05

- Independently owned the UI design and frontend implementation of the entire dashboard, turning foot-traffic, seat-occupancy and book-status data into a visual board;
- Improved data readability and real-time operational visibility through multi-module layout and interaction design (frontend).

Multimodal RAG Document-QA System over a Personal Knowledge Base | Personal Project 2026.03 – 2026.05

- For personal / government-document knowledge management; supports PDF / Markdown / image sources; built the full pipeline of offline indexing → online retrieval → evaluation;
- Used hybrid retrieval (BM25 + dense vectors) with rerank refinement and OCR / VLM for image-text documents; evaluated chunking and retrieval strategies quantitatively with RAGAS and Hit@k / MRR to improve answer accuracy. (Python, LangChain, Chroma, BM25, RAGAS)

EXPERIENCE & COMPETITIVE

Suning Esports Club | Training Partner, China National Team (Asian Games) 2018 · 2023

- Peak global rank **298 in League of Legends (Top 0.001%)**; served as a training partner for the China national team during preparation for the 2018 Jakarta and 2022 Hangzhou (held 2023) Asian Games, providing high-intensity scrimmages and tactical support.

Jabil (Shanghai) | Full-stack Development Intern 2019.06 – 2020.06

- Co-designed and implemented a real-time collaborative document editor (Java + Vue); awarded 2nd place in the design competition.

HONORS & AWARDS

- National Invention Patent (CN201721739406)
- “Internet+” Competition — Provincial 2nd & Univ. 1st
- Undergraduate Scholarships — 1st ×1, 2nd ×1, 3rd ×2
- “Huawei Cup” Java Programming Contest — 3rd Prize
- ASUS Partner (ACM) — Outstanding Campus Lead
- Host of two campus spring/autumn sports ceremonies
